Information Technology Systems graduate from Institut Teknologi Bandung with experience in Quality Assurance, data analysis, web development, system analysis, and AI-based image classification. Skilled in translating requirements into test cases, analyzing systems and data, and collaborating in cross-functional teams.

EDUCATION

Institut Teknologi Bandung Bandung, Indonesia
B.S. Information Technology Systems Aug 2022 – 2026

- Developed academic projects spanning UI/UX, system analysis, application logic, SQL/database modeling, machine learning, and data visualization.
- Contributed as a Teaching Assistant for Pancasila, facilitating discussions, grading assignments, and supporting student engagement.

EXPERIENCE

PT Akhdani Reka Solusi Bandung
Quality Assurance Nov 2025 – Jan 2026

- Performed manual testing on the SIMPUS web application by creating and executing test cases based on system requirements and user workflows.
- Developed and executed automated tests using Selenium to improve testing efficiency and reduce repetitive manual testing.
- Identified, documented, and reported bugs; collaborated with developers to verify fixes and maintain system quality.

PT Bringin Inti Teknologi Jakarta
Quality Assurance Jul 2025 – Sep 2025

- Executed functional and usability testing as part of a 3-member QA team for Bee-RP, a web-based employee management system covering project tracking, attendance, leave requests, and performance reports.
- Led Quality Assurance activities for TrackMate, an employee task-tracking web application, within a 2-person team.
- Collaborated with developers and stakeholders to identify defects, validate fixes, and support UAT readiness.

PT Sarana Pactindo Bandung
Data Analyst Intern Jun 2024 – Jul 2024

- Developed a web-based billing forecast system and performed data analysis to support updates for two company websites.
- Collaborated with two stakeholders to gather requirements, improve system accuracy, and enhance user interface and operational efficiency.

Private Tutor Bandar Lampung
STEM Tutor (Math & Physics) Mar 2023 – Apr 2023

- Delivered one-on-one Mathematics and basic Physics tutoring for elementary and middle school students.
- Simplified complex concepts using engaging, age-appropriate methods to strengthen problem-solving skills and exam readiness.

PROJECTS

KukangSort AI – Final Year Project Institut Teknologi Bandung
Web-Based Animal Camera-Trap Image Classification System 2026

- Implemented YOLO11-based image classification in a web-based system for automatic sorting and classification of Sunda slow loris (kukang) camera-trap images.
- Developed a two-stage pipeline combining image sorting, kukang verification, and behavior classification to support wildlife image analysis.
- Integrated the machine-learning models with a FastAPI backend and web interface for single-image and batch processing.
- Evaluated model performance and system processing time to assess classification reliability and practical deployment.

Muslim Pro App Institut Teknologi Bandung
UI/UX & Application Design Academic Project

- Collaborated in a 4-member team to design a Muslim Pro application, translating user needs into interface and feature concepts.

Songket Aninun Institut Teknologi Bandung
Enterprise Needs Analysis Academic Project

- Analyzed enterprise needs and system requirements for Songket Aninun, identifying processes and technology considerations.

Destroy the Temple Institut Teknologi Bandung
Game Development Academic Project

- Developed a game in a 4-member team, implementing application logic and gameplay mechanics.

Minecraft Database Institut Teknologi Bandung
Database Design Academic Project

- Designed a database model for a Minecraft-related project, applying SQL and relational database concepts.

Plants vs. Zombies Institut Teknologi Bandung
Game Development Academic Project

- Collaborated in a 5-member team to develop a simplified Plants vs. Zombies game, focusing on gameplay logic and UI.

Word Machine Institut Teknologi Bandung
Application Development Academic Project

- Built the Word Machine project in a 5-member team, applying data structures, UI, and application logic.

Crowdfunding IT System Institut Teknologi Bandung
System Analysis Academic Project

• Analyzed a crowdfunding IT system in a 2-person team, mapping user flows and service structures.

AI Data Analysis Institut Teknologi Bandung
Machine Learning & Data Analysis Academic Project
• Performed data preprocessing, visualization, and insight generation in a 3-member team using machine learning fundamentals.

LEADERSHIP & ACTIVITIES

Himpunan Mahasiswa Informatika Bandung
Incubator IT / DPP Aug 2023 – Present
• Led project planning, execution, and delivery while aligning activities with goals, timelines, and team responsibilities.
• Coordinated cross-functional teams, delegated tasks, and monitored progress using structured project-management approaches.
• Facilitated stakeholder communication, managed risks, and prepared project documentation and progress evaluations.

OSKM ITB Bandung
Panitia Ekstrakampus Aug 2023 – Oct 2023
• Supported extracurricular events through logistics planning, budgeting, external coordination, communication, promotion, and participant registration.
• Contributed to smooth event-day operations and positive participant experiences.

SKILLS

Technical: Programming Fundamentals • Database Design & SQL • Web Development • System Analysis & Requirements Engineering • Data Analysis & AI • UI/UX Design & Application Prototyping • Manual & Automated Testing • Selenium
Soft Skills: Public Speaking • Negotiation • Time Management • Task & Project Management • Team Collaboration • Problem Solving
